Projects

GANTAVIA – Full Stack Tourist Companion Web Application
React.js | Node.js | Express.js | MongoDB | JWT | Tailwind CSS

- Developed a full-stack travel web application for destination exploration, trip planning, and booking management
- Implemented secure user authentication (JWT) and protected routes
- Built trip planning system with budget estimation, and activity suggestions
- Integrated real-time weather API and Google Maps for enhanced user experience
- Designed booking system with user-specific dashboard and MongoDB backend storage
- Developed RESTful APIs and handled frontend-backend communication using Axios
- Used Git & GitHub for version control, branching and pull request collaboration

YASDEV - Front-End Developer
https://www.yasdev.com/
Typescript | Next.js | Tailwind CSS

- Developed and maintained frontend components using Typescript
- Built responsive design

Portfolio Website
https://www.yachna.cv/
JavaScript | CSS | React.js

- Responsive Design
- Contact form implementation
- Deployed with custom domain on Vercel
